

**A STEM-FOCUSED
COLLEGE SCHOLARSHIP
FOR THE INNOVATORS
OF TOMORROW!**

Greetings,

We are reaching out to you today to share an exceptional opportunity that could make a significant difference in the lives of your students – The Lariat Future Innovators Foundation STEM Scholarship.

As college costs rise, higher education becomes increasingly out of reach for many students, especially those in rural areas. Our foundation aims to change that by providing annual STEM scholarships to promising students from small towns with lower-income backgrounds. We believe in the power of curious, highly motivated innovators who can shape our future. In the past year alone, we provided 11 STEM-focused students with a total of \$88,000.

What sets our scholarship apart is its remarkable duration – it spans all four years of a student's college career, contingent upon the recipient's GPA meeting the qualifying standards. We firmly believe in investing in the long-term success of our scholars, ensuring that financial constraints do not hinder their academic performances. Applicants who are awarded the Lariat Future Innovators Foundation scholarship, and who continue to meet eligibility standards, will receive the following:

\$6,000
as a Freshman

\$6,000
as a Sophomore

\$8,000
as a Junior

\$10,000
as a Senior

To be eligible, students should be from a small town with a population of fewer than 25,000 people and have a family household income of \$55,000 or less. We seek those who are highly motivated, have a track record of excelling in projects or winning science/math awards, and demonstrate a passion for STEM studies. Strong performance in math and science (3.5 GPA or above, AP courses, mostly A's) is also valued.

We respectfully request your assistance in identifying eligible students and encouraging them to apply for this life-changing scholarship. Help us inspire the next generation of innovators who can make a significant impact. For more information about us, the application process or to simply learn more about this scholarship opportunity, simply visit us at LariatFoundation.org.

Thank you for your dedication to empowering your students' educational and career journeys. Later in this academic year, we will provide you with a poster to display in your school, which will guide students on how and where to apply for this opportunity. Together, let's shape a future brimming with innovation and endless possibilities!

Warm regards,
Jason Wilson, Lariat Future Innovators Foundation
